

**The Surrey County Council
Hoadley Road, Horley
(30 Mph Speed Limit) Order 202-**

The development is Westvale Park, a large residential development to the Northwest of Horley.

Hoadley Road is a new estate road which leads east towards the A23 Bonehurst Road. The section of Hoadley Road through the built area of site will be a 20mph zone (subject to a future application). The remaining section included in this application will be a 30mph road, requiring a TRO as there is no street lighting.

Proposals – TRO for 30mph speed limit along Hoadley Road from the junction with the A23 over the first 850m to a location between the bridge to the east and culvert to the west.

Background – The section of Hoadley Road between the A23 and the start of the built development is proposed to be a 30 mph speed limit. Normally a TRO would not be required as there would be street lighting which would automatically provide a default 30 mph limit. Due to the local environment this section of Hoadley Road does not have street lighting so a TRO is required to allow the 30mph limit to be enforced.
